Response to Amendment

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1637.

1. The amendment filed 3/28/2002 has been entered.
2. The objection of the specification is withdrawn because of the amendment.
3. The objection of claim 11 is withdrawn because of the amendment.
4. Claims 3-6 remain objected since there is no argument regarding the objection made in section 8 of the Office action mailed 12/19/2001.
5. The rejections of claims 1-20 under 35 U.S.C. second paragraph in section (a), (b), (d) and (e) of the Office action mailed 12/19/2001 are withdrawn because of the amendment.
6. Claims 2-5 under 35 U.S.C. second paragraph in section © of the Office action mailed 12/19/2001 remain rejected because it is still unclear what is meant by the language "3000-fold range of specificity" based upon the explanation in the response.
7. Claims 1-2, 7, 9 and 14-20 remain rejected under 35 U.S.C. §102(b) anticipated by Soreson et al. (5,496,699).

Applicants argue that claims 1 and 15 require two primers that have the same nucleotides at their 3' termini but differ in the number of non-complementary nucleotides located within the five nucleotides adjacent to the 3'-terminal nucleotide. However, these limitations are not in the

Art Unit: 1637

claim language. Nevertheless, one of the member of two primer pairs at 3' end are the same. Are the another members of two primer pairs at 3' end different or the same? Thus, Applicant's arguments filed 3/28/2002 have been fully considered but they are not persuasive. The rejection is maintained.

8. Claims 10 and 12-13 remain rejected under 35 U.S.C. §103(a) over Soreson et al. (5,496,699) as applied to claims 1-2, 7, 9 and 14-20 above, and further in view of Mullis et al. (4,965,188)

Since claim 10 depends from claim 1 which remains rejected under 35 U.S.C. §102(b) anticipated by Soreson et al. (5,496,699) as discussed above, the rejection of claims 10-13 is maintained.

Allowable Subject Matter

9. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1637

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

11. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is (703) 305-7112. The examiner can normally be reached on Monday-Friday from 8:00 AM-4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached at (703) 308-1119 on Monday-Friday from 10:00 AM-6:00 PM.

Any inquiries of a general nature or relating to the status of this application should be directed to the Chemical/Matrix receptionist whose telephone number is (703) 308-0196.

12. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Art Unit 1637 via the PTO Fax Center located in Crystal Mall 1 using (703) 305-3014 or 308-4242. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989).
